MACHINE LEARENING DEVELOPMENT LIFE CYCLE (MLDLC)

1. **Frame the Problem:**

2. **Collecting data:**
   CSV file, API, Web Scrapping.

3. **Data Preprocessing:**
   Remove duplicates, Remove missing values, Outliers, Scaling Values.

4. **Exploratory Data Analysis:**
   Visualization, Univariate Analysis, Bivariate or multivariate analysis, Outlier detection, Imbalance handling.

5. **Feature Engineering and Selection:**
   (Inputs known as Feature)
   - Enhancing features are known as Feature Engineering.

6. **Model Training, Evaluation and Selection:**
   Performance matrix, Parameter's, Ensemble learning.

7. **Model Deployment:**

8. **Testing:**
   Beta Testing, A-B testing,

9. **Optimize:**
   Model Backup, Data Backup, Load balancing, Retrain, Rotting.
